**VEGETABLES AND FRUIT EXHIBITORS**

Please select your Fair entries according to standards of fruit and vegetable shows. Select with these five factors in mind.

**SIZE:** Know the normal size of the variety. Select as near to that size as possible. Oversize is not necessary but is good if you can meet the other factors.

**TYPE:** Each variety of each species has type characteristics. These characteristics should be evident in each specimen of each entry. Don't mix varieties.

**CONDITION:** In so far as possible, the exhibit should be in the peak of either edible or storage condition. Any evidence of disease or insect damage reduces the score also.

**COLOR:** Select according to color characteristics of the variety.

**UNIFORMITY:** In exhibits of multiple specimens, uniformity of size, type, condition, and color is very important. It is better to sacrifice on size and color and to achieve uniformity. Be very reluctant to sacrifice condition and never sacrifice type.

**A LOGICAL SCORE TABLE**

Size.....	10%
Type.....	25%
Condition.....	20%
Color.....	20%
Uniformity.....	25%

Use this suggested scoring in selecting your exhibit and you will be helping your show.

**PREPARING FOR EXHIBIT**

**Onions-** Cut off tops leaving approximately an inch of top, rub off roots and leave at least one layer of the papery protective skin on the onion.

**Potatoes-** Don't wash or polish. Select potatoes at a time when they will harvest clean. Slight brushing with a soft clean cloth may be permissible to remove dirt if necessary to do so. The same applies for sweet potatoes, carrots, parsnips, rutabagas, salsify, beets, turnips or any root crop.

**Root Crops-** with a crown and foliage directly attached, clip foliage off at approximately one inch from the crown.

**Vine Crops-** must have stems attached or included with exhibit. This includes cucumbers, squash, pumpkins, muskmelons and watermelons.
